

Create new “general project”

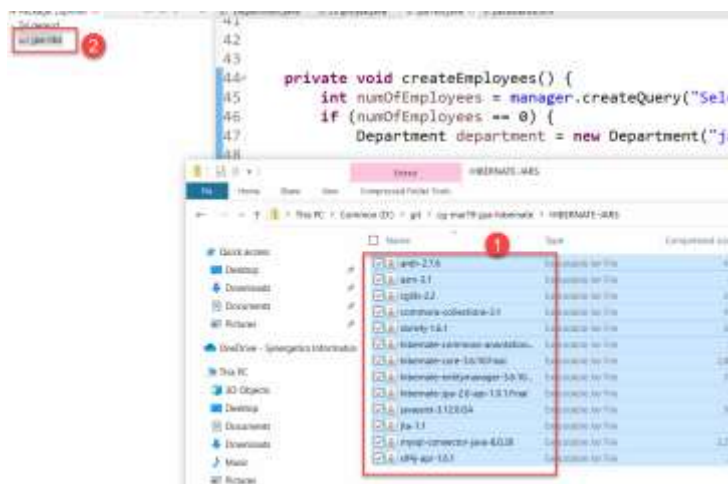

Enter project name as “jpa-libs” and click “finish”

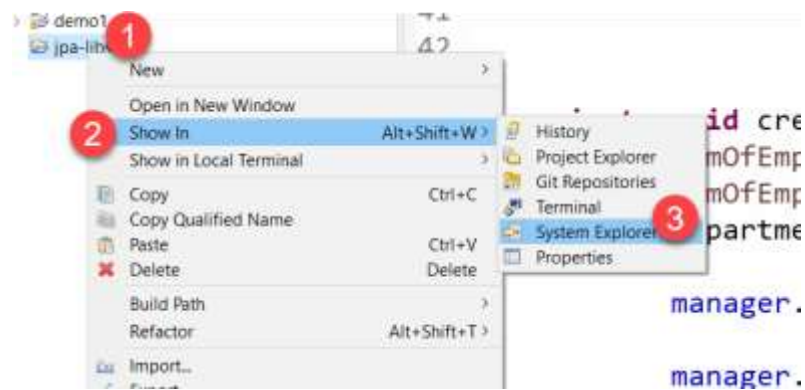

Download hibernate-jars.zip from <https://github.com/mahendra-shinde/cg-mar19-jpa-hibernate/raw/master/HIBERNATE-JARS.zip>

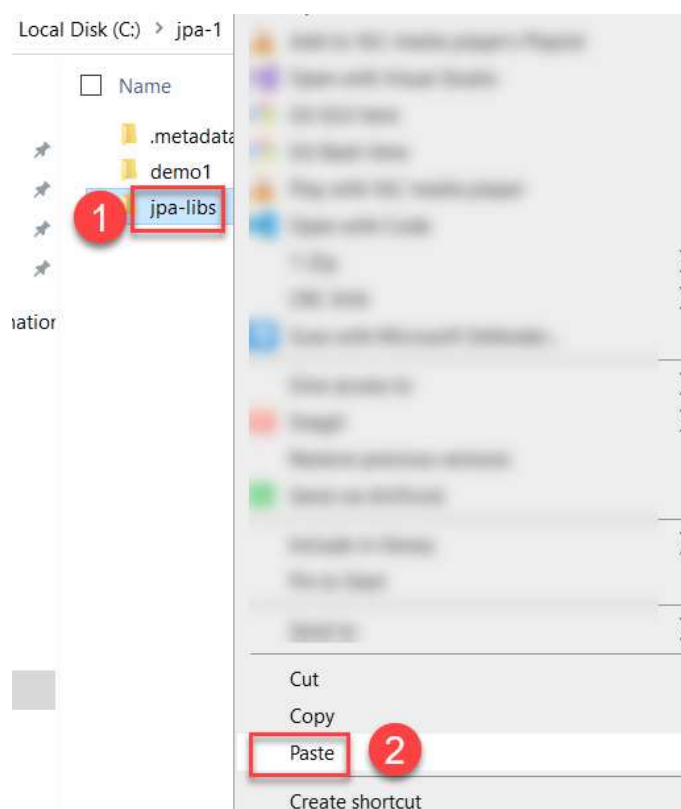

And extract in temporary folder, you need to then select all the JARS and copy them.

Open the “jpa-libs” project in “System Explorer “ (File Explorer of Windows)

Once System Explorer shows the directory, just right click and use “Paste” option to copy all files.

Refresh The project to get list of all JARS
